R & D

Optoelectronics

Don't let conventional production furnaces rob the productivity and efficiency from your electronics manufacturing area. With MRL's innovative Bandit Horizontal Furnace, you can process today's emerging, specialized devices by accommodating reduced or variable load sizes, high and/or low temperature requirements, and a multiplicity of process options. Additionally, you can bank on:

- *Space saving/reduced footprint design*
- *Superior temperature uniformity and throughput*
- *Reduced power and gas consumption*
- *Attractive, stainless-steel uni-frame structure that's sound and safe, as well as environmentally friendly*
- *MRL's patented element technology and easy maintenance design*
- *A choice of 1, 2, 3 and 4 chamber configurations*
- *Up to 300mm substrate capability*
- *Atmospheric and LPCVD applications*

Contact MRL regarding your specific requirements today.
